

I claim:

1. A method for the treatment of a disease or a condition which is treatable by inhibition of ornithine decarboxylase, which comprises administration of a therapeutically active or ornithine decarboxylase-inhibiting amount of a salt of 2-difluoromethyl-2,5-diaminopentanoic acid with chitosan.
2. A method for the prevention of a disease or a condition which is preventable by inhibition of ornithine decarboxylase, which comprises administration of a therapeutically active ornithine decarboxylase-inhibiting amount of a salt of 2-difluoromethyl-2,5-diaminopentanoic acid with chitosan.
3. The method as defined by claim 1, wherein a salt of 2-difluoromethyl-2,5-diaminopentanoic acid with chitosan is administered to treat a disease or condition selected from the group consisting of cancer, benign prostatic hypertrophy, protozoal infections, actinic keratosis, and hirsutism.
4. The method as defined by claim 2, wherein a salt of 2-difluoromethyl-2,5-diaminopentanoic acid with chitosan is administered to prevent a condition or disease selected from the group consisting of cancer, benign prostatic hypertrophy, HIV, protozoal infections, actinic keratosis, and hirsutism.
5. A method wherein a salt of 2-difluoromethyl-2,5-diaminopentanoic acid with chitosan is administered topically to prevent hair growth.
